## Map of Loggy's Journey

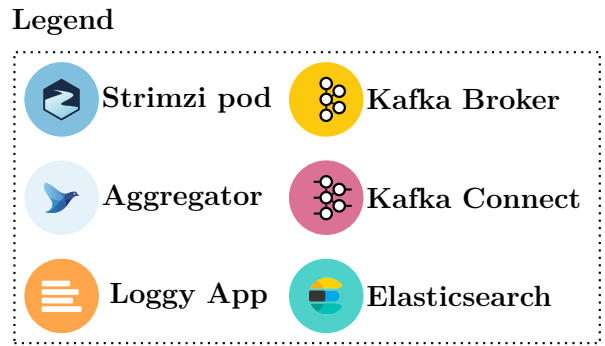

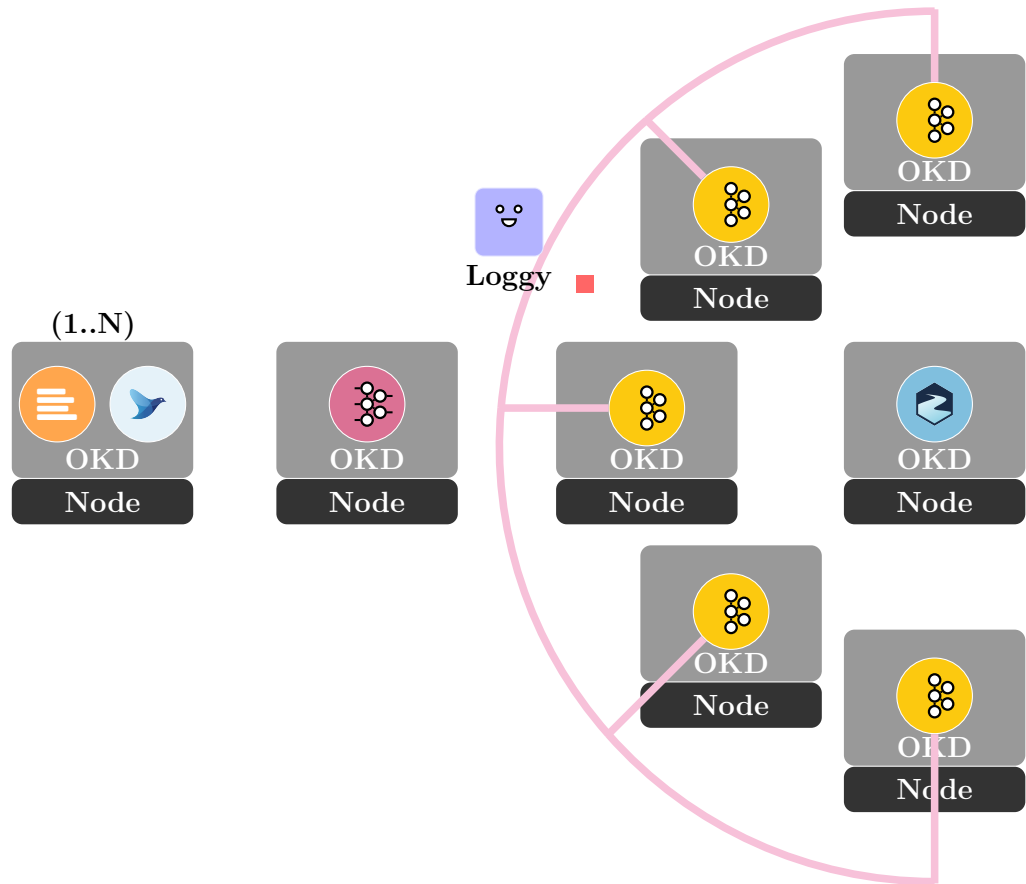

The diagram illustrates the components of a data pipeline, enclosed in a dashed box. The components are arranged in two rows:

- Top row: Strimzi pod (blue circle with a white cube icon) and Kafka Broker (yellow circle with a black cluster icon).
- Middle row: Aggregator (light blue circle with a white bird icon) and Kafka Connect (pink circle with a black cluster icon).
- Bottom row: Loggy App (orange circle with a white list icon) and Elasticsearch (teal circle with a white and yellow icon).

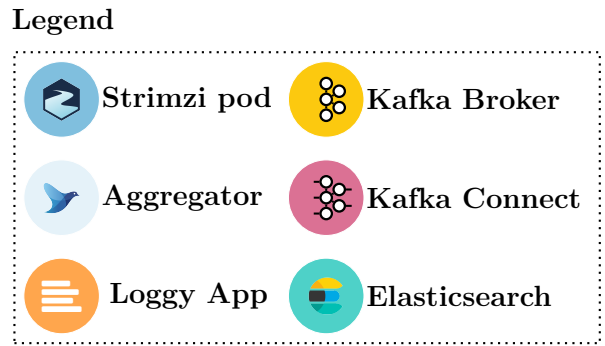

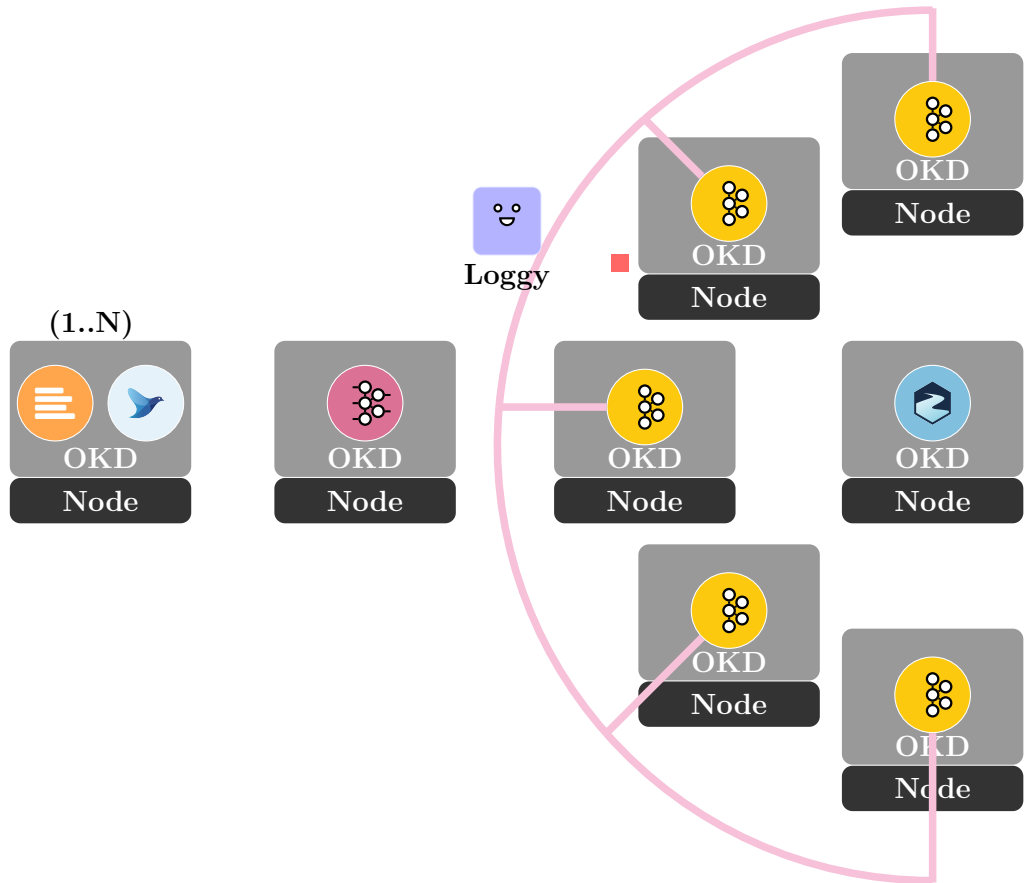

## Map of Loggy's Journey

- 
- ```

graph LR
    A[Strimzi pod] --> B[Kafka Broker]
    B --> C[Aggregator]
    C --> D[Kafka Connect]
    D --> E[Loggy App]
    E --> F[Elasticsearch]
  
```
- The diagram illustrates a data pipeline architecture. It consists of the following components and their connections:
- Strimzi pod** (blue circle with a white icon) connects to **Kafka Broker** (yellow circle with a black icon).
  - Kafka Broker** connects to **Aggregator** (light blue circle with a white icon).
  - Aggregator** connects to **Kafka Connect** (pink circle with a black icon).
  - Kafka Connect** connects to **Loggy App** (orange circle with a white icon).
  - Loggy App** connects to **Elasticsearch** (teal circle with a white icon).
